

ANSI Standards regarding aerial device operator training

ANSI A92.2 2015 Revision
Effective June 2016

8.12.2 General Training. Only personnel who have received general instructions by a qualified person regarding the inspection, application, and operation of aerial devices, including recognition and avoidance of hazards associated with their operation, shall operate an aerial device...

8.12.4 Familiarization. When an operator is directed to operate an aerial device they are not familiar with, the operator, prior to operating, shall be instructed by a qualified person...

The Advantages of Sentry® Program Instructor Led Training Are:

- Includes General Training in the classroom, Familiarization and on unit performance evaluation
- It meets requirements of standards
- Taught by expert instructors
- Ateco and the employer can maintain certification records
- Available for: digger derricks, insulating, non-insulating, and tree care aerials
- "On Site" instruction at any of your locations.
