

## MATERIAL HANDLING ATTACHMENT

ADDING VERSATILITY TO THE  
LIGHTS & SIGNS INDUSTRY

## MATERIAL HANDLING ATTACHMENT

Altec's material handling attachment offers another lifting option to operators working with an Altec LS aerial device. The attachment has been designed to aid operators with the installation of signs or message centers underneath existing signs or awnings. Current equipment and work practices do not always allow for the most efficient installations, but with the flexibility and durability of this new attachment, operators can tackle those hard-to-reach installations. Operators can increase their productivity, avoid damage to signs or buildings, and be more efficient at the jobsite with the new material handling attachment.

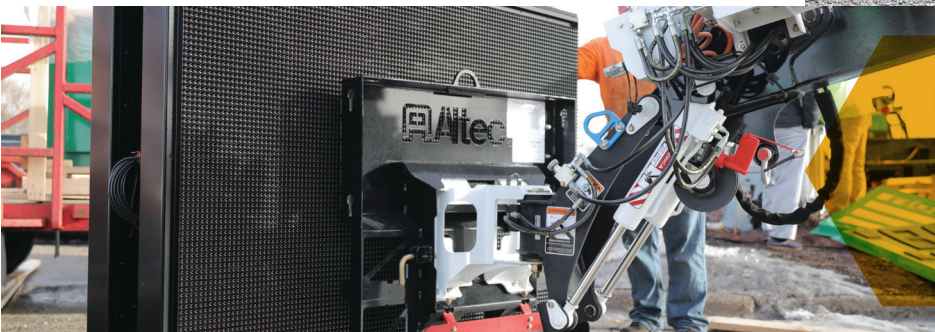

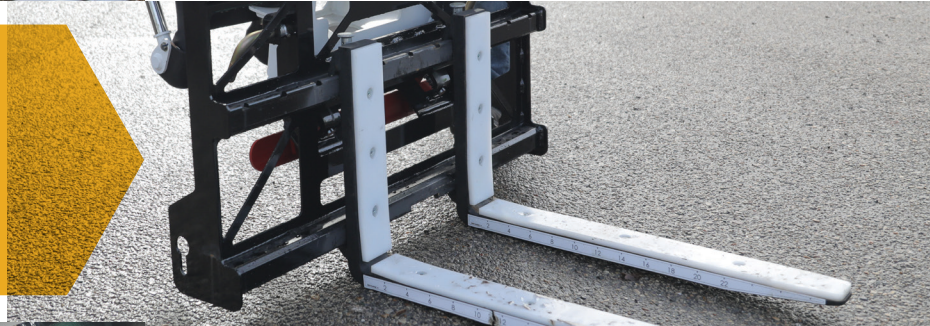

### EASY INSTALLATION

The material handling attachment utilizes the same brackets and pins as the current platforms on the LS product for easy installation and removal. It can be used on any existing Altec LS product.

### ADJUSTABLE LOAD ARMS

The load arms are adjustable side to side to support the load as needed. They can be adjusted from 10 in to 40 in wide and can hold up to 1,000 lbs based on load center distance. The arms have UHMW protective pads to protect the load from damage. The arms can also be quickly removed to facilitate stowage if needed.

### ANCHOR POINTS TO SECURE LOADS

A minimum of eight anchor points have been provided for securing the load to the attachment. The backrest has been designed so that operators could use just about any point on it to tie down a load. The backrest is 40 in wide x 45 in tall x 8 in deep.

### STORAGE AT TAILSHELF

The attachment can easily be stored and secured in a specially designed stowage provision at the tailsheaf. The main line winch can be used to load and unload the attachment using the crane loop provided at the top of the attachment.

## MEETING YOUR LIGHTS & SIGNS NEEDS

Altec's product line of lights and signs equipment includes aerial lifts with superior side reach and boom truck cranes designed with versatility and industry-leading durability. Our standard features coupled with customizable options including body, platform and mounting configurations provide you the flexibility to select the piece of equipment needed for your work practice.
