315

The 315 crane achieves maximum lifting performances for installations on 2-axle trucks, thanks to a design that is careful to all the details of construction and the use of materials with the highest structural strength. The PROGRESS electronics has also made it possible to reach excellent results concerning operating speeds and load handling capacity, ensuring the highest standards of operational safety. The crane has jibs of modern design with extraordinary outreach and lifting capacity, which are at the top of the category.

DIMENSIONS

PERFORMANCE

DESCRIPTION	UNIT OF MEASURE	3S	4S	5S	6S	8S
Max. hydraulic outreach	ft	34'8"	42'1"	47'11"	55'6"	70'3"
Max. lifting moment (+20°)	lb*ft	209580	203930	201180	198540	193080
Slewing arc	[°]	endless				
Slewing Capacity - Max slope	%	8.7				
Working pressure	p.s.i.	4931				
Max oil delivery	gpm	26.4				
Oil tank capacity	gal.	42				
Weight of the standard crane (± 2%)	lb	7195	7590	7890	8165	8695

STANDARD

Hexagonal boom profile

Fly-jib articulating for more than 180°

Outer boom articulating for more than 180°

Stabilizers with hydraulic outlet

Sequence valves

Oil cooler

Slewing ring and reduction gear unit

Radio remote control with display

Progress 2.0

"Pro.Dec. System" Cylinders with progressive stop at the end of their stroke

"High Speed System" Increased speed of extension cylinders

ETL (Effer Twin Links)

Radio remote for stabilizers

OPTIONALS

Swing-up stabilizers, hydraulically activated

"Wind & Drive" Crane foldable with the fly-jib on, without removing the winch components

Winch

Crane adjustment for crane equipped with basket

Radio remote with joystick

C Version

H Version: base version for countries outside EU.
