

OPERATOR SAFETY WEBINARS

The 60-minute interactive webinar sessions are facilitated using the Microsoft Teams platform, virtual learning tools, handouts, and real-time instruction. The intent of these webinars is to reinforce practices learned during unit General Training and are perfect for new hires or veterans. Webinars are \$35 per person - call us for group rates!

After registering and one week prior to the session, you will receive an email confirming your registration. You will also receive a calendar invitation. You will be able to access the webinar at the scheduled time by clicking on the Microsoft Teams link in the email or through the calendar invitation. We recommend logging in a few minutes early; the meeting will be opened 10 minutes prior to the scheduled start time to get everyone used to interacting with the virtual tools.

- » **Can't attend a scheduled webinar?** Ask us about access to a recording of the webinar!
- » **Have you previously attended the Altec Sentry Train-the-Trainer course?** Ask us how webinars can count towards your 3-year trainer renewal!

FREQUENTLY ASKED QUESTIONS

What am I expected to do during these webinars? You will be asked to engage with the course content and the trainer throughout the session. This is done using audio, webcam, polls, and the chat. There will also be time at the end of the session to ask the instructor questions.

Can I request a webinar just for my crews? Absolutely! Fill out the Virtual Training Request Form and contact our Help Desk at sentrypost@altec.com to schedule a personalized webinar.

What equipment will I need?

You will need a computer or electronic device with a stable internet connection, a webcam (often built into laptops), and a headset or headphones with an attached microphone.

What software do I need? Altec Sentry uses the Microsoft Teams webinar platform. When you click on the link in your registration email or calendar invite, you will be given the option to join the meeting from the Microsoft Teams application or from your internet browser. For the best experience, we recommend downloading the Windows application; however, you can attend without downloading or installing by clicking "continue on this browser" after the prompt.

Do I have to take the webinars in a certain order? No, not at all! Our webinars are designed to be informative whether it is your first session or your tenth.

How do I sign up for webinars?

You can sign up by contacting our Help Desk at sentrypost@altec.com or 205-408-8260.

Digger Derricks - How to Use the Load Charts for Safe Lifting

Tuesday 12/01/2026 @ 10 AM CST
Thursday 12/03/2026 @ 2 PM CST

WEBINAR TOPICS

Aerial Devices - Inspection, Set Up, and Operating Best Practices

Refresh your knowledge on the components that must be inspected during an inspection, common faults found, and how to better train your operators to find and remedy common faults. Participants will have the ability to engage with the virtual trainer and ask questions regarding inspection, set up, and operating best practices.

Digger Derricks - Inspection, Set Up, and Operating Best Practices

Refresh your knowledge on the components that must be inspected during a pre-operational inspection, common faults found, and how to better train your operators to find and remedy common faults. Participants will have the ability to engage with the virtual trainer and ask questions regarding inspection, set up, and operating best practices.

Digger Derricks - Load Charts and Safe Lifting Practices

Whether your organization handles material every day or rarely takes on those jobs, a base knowledge of the material handling capabilities of your unit is important. Join a Sentry virtual trainer to discuss load charts, unit set-up, and other material handling safety topics. Participants will have the ability to engage with the virtual trainer and ask questions.
