

SERVICE MAINTENANCE TRAINING OVERVIEW

Altec provides Service Maintenance Training to our customers to keep crews safe and reduce downtime. Our extensive training options are designed to help your mechanics gain equipment and preventive maintenance knowledge to maintain your fleet safely and effectively. You can choose between a variety of instructor-led, webinar and online training options.

UNIT SPECIFIC TRAINING

In-Person | 1 - 5 days

In-person unit specific trainings vary from one to five days, depending on model. Training covers safety, unit operation, preventive maintenance, unit inspection and minor troubleshooting and repair processes for the unit, with hands-on training throughout. Upon completion of this training, mechanics will learn about the unit's hydraulic, mechanical and electrical systems.

UNIT SPECIFIC eCOURSES

Virtual | Self-paced

Unit specific eCourses are self-paced. They provide introductory maintenance information for the unit and are not intended to substitute for in-person training.

TECHNICAL WEBINARS

Virtual | 1 hour

Technical webinars are one-hour sessions hosted virtually via the Teams platform covering foundational technical information. Mechanics will interact with one of our trainers live during the session.

CUSTOMER BOOT CAMP

In-Person | 4 days

Customer Boot Camp is a four-day, in-person training covering basic electrical and hydraulic, PDM and troubleshooting content. This is a great place to start before attending unit specific training to ensure learners have a foundation in identifying components and reading schematics.

FLUID POWER MOBILE HYDRAULIC MECHANIC

In-Person | 5 days

This five-day FPS review, test preparation and testing session gives mechanics the ability to earn Fluid Power Society Mobile Hydraulic Mechanic Certification. This course is facilitated by Altec and FPS accredited instructors and follows the curriculum established by FPS.
